REPORTER

Dr. Dawnofsky, as the world's preeminent virologist, you've discovered a vaccine to eradicate Coronavirus. You state that this vaccine will create a shift in all of our lives, with changes that will be almost impossible for most people. Please describe the details of your discovery.

DR. DAWNOFSKY

After studying the data, I realized that all those infected are right-handed.

REPORTER

Aren't most people right-handed?

DR. DAWNOFSKY

Yes, but I wondered why no lefthanders, including lefties who are somewhat ambidextrous, hadn't contracted this disease. As a lefthander, I exposed myself to the virus but did not become infected. By isolating a specific blood/DNA characteristic, I created a serum for right-handers.

REPORTER

Are there dangerous consequences to this vaccine?

DR. DAWNOFSKY

Well, right-handers will have to relearn to tie their shoes, use scissors, measure, etc. In other words...they'll become left-handed. But immune to this disease.
